

The GO Show is an interactive Children's show with Music composed by Randy Chiurazzi and puppetry by Scott masters for children from 3-7 years old. The first collection of songs in the series, "Let's Go To Africa", contains 8 unique, 'interactive learning songs' that are constructed to form the basis for a different kind of play-learning utilizing the natural perceptual languages of the mind: visual, auditory and kinesthetic experience. After all, learning is discovering that something is possible. Audience members become performers as they groove to the sounds and participate in the call-and-response-activities embedded in the lyrics.

Thegoshowonline.com web site is a virtual toy box of materials designed to tie in to the themes in the music.

The Go Show vision is to provide electricity/energy to light the heart, mind and body of the world of children.
